EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Hanscom on 8-19-2009.

The application has been amended as follows:

Claim 72 is generic and allowable. Claims 74, 75, 77-81 and 83-106, previously withdrawn from consideration as a result of a restriction requirement, contain all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement among inventions 1-30, as set forth in the Office action mailed on 6-4-2008, is hereby withdrawn** and claims 74, 75, 77-81 and 83-106 have been hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

In claim 72, 8th line from the end, the word -- estimated -- has been added before the word "longitudinal" and the word "transverse", respectively; 5th line from the end, the word --

estimated -- has been added before the word "longitudinal" and the word "transverse"; and second line from the end, the word -- estimated -- has been added before the word "longitudinal" and the word "transverse".

In claim 74, second last line, the word -- image -- has been added before the word "locations" and the word -- estimated -- has been added before the word "longitudinal"; and last line, the word -- estimated -- has been added before the word "transverse".

In claim 75, second last line, the word -- estimated -- has been added before the word "longitudinal"; and last line, the word -- estimated -- has been added before the word "transverse".

In claim 77, first line, the word -- estimated -- has been added before the word "longitudinal"; and second line, the word -- estimated -- has been added before the word "transverse".

In claim 78, first line, the word -- estimated -- has been added before the word "longitudinal"; and second line, the word -- estimated -- has been added before the word "transverse".

Claim 90 has been canceled.

In claim 94, second line, the word -- estimated -- has been added before the word "transverse".

In claim 100, last line, the word -- estimated -- has been added before the word "longitudinal".

In claim 104, first line, the reference numeral “73” has been changed to -- 72 --; and last line, the phrase -- initial print image location -- has been added before the word “length” and the word “width”, respectively.

In claim 105, second line, the phrase “center point of said at least first and second printing groups” has been changed to -- center points of said print image locations of said first and second forme cylinders --.

Claim 106 has been canceled.

The above changes have been made to correct minor oversights in the claims and to place the application in condition for allowance.

The following is an examiner’s statement of reasons for allowance:

Regarding independent claim 72, no prior art has been found to teach the overall combination of a printing press structure including particularly a spacing of the at least first and second initial print image locations on the first printing forme and a spacing of the at least third and fourth subsequent print image locations on the second printing forme being arranged by the image application systems on the first and second printing formes in accordance with at least one of the estimated longitudinal elongation factor and the estimated transverse elongation factor, the print image location length factors and the print image location width factors each being a function of at least one of the estimated longitudinal elongation factor and the estimated transverse elongation factor, and the image application systems forming the initial and subsequent print images on the at least one first and second printing formes dependent on the at least one of the estimated longitudinal elongation factor and the estimated transverse elongation factor and prior to printing of the material to be printed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
